REPORT INFORMATION

Report Funding Cycle: 2019 April Cycle	Report Date: 06/23/2020 12:00 am
--	--

1: Please include in your report the dollar amount of the funds that were awarded, the date they were funded and what the funds supported.

Awarded Amount: 45,000	Date: 04/16/2019
------------------------	------------------

2: Were the objectives cited in your original proposal met? Please address each started objective and how it was met.

Yes, the objectives were met. Guadalupe Regional Medical Center (GRMC) has four new CoreMetrix fetal monitors that are supporting and enhancing neonatal and newborn safety. The monitors deliver a consistent level of care for all our mothers.

3: Please explain any changes from the original proposal and the circumstances that lead to the modification of the objective.

There were no changes to the original proposal.

4: What needs were addressed?

The need that was addressed was insufficient and out of date fetal monitors. By replacing the outdated fetal monitors, every patient now receives the same level of patient care. The previous monitors were not technologically supported, thereby creating loss of confidence in functionality.

5: What method of evaluation did you use to monitor and measure the project's outcome and what are the result?

The primary objective of the purchase of the four CoreMetrix fetal monitors was to ensure all seven labor rooms at GRMC were equipped with fetal monitors that provide the same high standard of care for all laboring mothers.

Since acquiring the new fetal monitors, our Birthing Center continues to have every labor room full at least twice per month. As a result of replacing the outdated fetal monitors with the upgraded CoreMetrix monitors, the Birthing Center is able to safely and effectively care for every patient with confidence that the fetal heart rate readings are being traced accurately in every room.

We are happy to report one specific incident that illustrates the effectiveness of these monitors. The Birthing Center received a patient in active labor with twins during an extremely busy shift where only one labor bed was available. The patient was able to be safely monitored with the CoreMetrix fetal monitor before she was transported to the Operating Room for delivery. The CoreMetrix monitor was transported with the patient for continued monitoring during delivery where the patient eventually delivered her second baby by emergency c/section. The patient and her twins had a positive outcome. Had the upgraded monitor not been available the staff would have had to use an outdated unreliable fetal monitor during this already stressful situation.

6: Do you plan to continue this project, and if so, how do you plan to sustain it?

Yes, the four CoreMetrix fetal monitors are a vital part of our OB department.

We plan to sustain it by maintaining the equipment by our certified bio medical technician to ensure appropriate repair.

7: Please provide any other comments or information relevant to this grant.

We are grateful for this donation. The CoreMetrix fetal monitors provides a consistent level of care for every patient room at GRMC.

8: Please provide an updated detailed projected budget with expenses for the received grant. Also include the totals for the budgeted and actual amount. Explain any discrepancies between the budgeted and the actual expenses for the project.

Line Item Description	Total Project Funds Allocation	Najim Requested Funds	Project Funds Actual	Najim Funds Allocation
Four CoreMedtrix Fetal Monitors	\$45,000	\$45,000	\$45,000	\$45,000
TOTAL:	\$45,000	\$45,000	\$45,000	\$45,000
